

SOLAR ELECTRIC SYSTEM INSTALLATION PROCESS

PHASE 1 – INITIAL CONSULT

1. We discuss any and all questions you have about solar during the initial phone consultation.
2. You provide us with your monthly electricity usage in kWh, for a full 12-24 months, if available.
3. We provide you with an informal estimate for your solar electric system. If that estimate is satisfactory, we arrange to visit your home to check your electric panel and look for shading issues.

PHASE 2 – DESIGN & PERMITS

1. We design your turnkey solar electric system.
2. We prepare a QUOTE for your review and approval.
3. Upon receipt of your signed quote, we send you a CONTRACT to build your solar electric system.
4. You approve and return the signed contract to us.
5. We file the application with your utility company to reserve your ENERGY INCENTIVE.
6. When your Reservation Confirmation is received, we draw up the plans for your system.
7. We submit the building permit application, with the drawings, to your city.
8. We contact our supplier to reserve your solar electric system components.

PHASE 3 – APPROVALS & BUILD

1. We submit your Utility Interconnection Application and Site Plan diagram to your utility.
2. After the Building Permit is received, we place the order and purchase your solar components.
3. When your solar electric components are delivered, we install your solar electric system.
4. We schedule the inspection of your solar electric system with your city's Building Inspector.
5. Upon passing the city inspection, we submit the request to commission your system for grid connection to your utility company.

PHASE 4 – INSPECTION & CONNECTION

1. Depending on your utility company, the date for your system Commissioning can take 1-4 weeks.
2. Utility company inspects your solar electric system and approves connection to their grid.
3. Your utility company commissions your solar electric system, and allows your connection to the grid.
4. Your solar electric system is now online, generating electricity for your home!
5. We submit the required final paperwork to your utility company to request your incentive payment.
6. Your utility company sends the Energy Incentive payment within 3-5 weeks.
